

ALL3D Growth Strategy Report

How to Acquire Shopify Vendors With Stratum

Growth Model, Build Analysis, and Roadmap

Prepared for: Amra Tisi (ALL3D), Jeremy Elliott (Engineering Partner)

Prepared by: Mark Gentry, MetaboMaxPro, Inc.

June 2026

1. Executive Summary

ALL3D has ~100 users. The free demo converts at ~1.5%. The market is 25K-35K reachable Shopify vendors in the US. The question is: how do you grow from 100 to 1,000+?

This report analyzes four paths to growth: Traditional GTM agency, Stratum + off-the-shelf tools, Stratum + custom-built delivery, and building an Aktify competitor from scratch. For each, we project users, costs, timelines, and risks.

The conclusion: Stratum + off-the-shelf tools generates revenue in week 1 while a proprietary delivery stack is built in the background. No other path offers both immediate revenue and long-term competitive moat.

Time to first revenue	4 weeks	1 week	6 weeks	12 weeks
Conversion rate	0.10%	0.30%	0.40%	0.15%
Users in 6 months (10K/mo)	18	54	72	27
Users in 12 months (10K/mo)	72	216	288	108
Cost per user (12mo)	\$1,667	\$556	\$417	\$1,111
Competitive moat	None	Low	High	Medium
Revenue in month 1?	No	Yes	No	No

2. The Addressable Market

ALL3D targets Shopify vendors who need better product images. The market is large but must be segmented realistically.

Total Shopify stores (global)	2,900,000	2.9M
Active (sales in 90 days)	~1,200,000	1.2M
Category fit (furniture, fashion, beauty, home)	~300,000	300K
US-based (likely first market)	~100,000	100K
50+ SKUs (serious vendors)	~40,000	40K
Not already using 3D/AI images	~35,000	35K
Reachable via public storefront	~25,000-35,000	25-35K

The realistic TAM is 25K-35K US stores. Global multiplies by 3-4x. With 5-10% annual churn, the entire US market can be contacted in 2-3 years at moderate volume.

Market by Vertical (US Estimates)

Vertical	Stores	Avg AOV	Photo Need	ALL3D Fit
Furniture	8,000	\$450-600	High (lifestyle, 3D)	Excellent
Home Decor	7,000	\$150-300	High (room context)	Excellent
Fashion/Apparel	10,000	\$60-120	Medium (studio)	Good
Beauty/Cosmetics	5,000	\$40-80	Medium (lifestyle)	Good
Lighting	2,000	\$200-400	High (room placement)	Excellent
Jewelry	3,000	\$100-500	Low (white bg sufficient)	Moderate

3. The Acquisition Funnel

Every user acquisition strategy follows the same funnel. Stratum improves every stage.

Contact identified	Any store in category	Scored + prioritized	Causal score picks best-fit vendors
Contacted (email/SMS)	Volume depends on infra	Volume depends on infra	Same
Opened / responded	1-3% open, 0.5-1% reply	5-12% response rate	Personalized subject + ROI proof
Clicked demo link	0.2-0.5% of contacted	2-5%	Message proves ROI before click
Tried free demo	1-2% of landing visitors	5-10%	Message matches their barrier
Converted to paid	8-12% of trial users	12-18%	Right-fit vendors convert better
End-to-end	0.05-0.15%	0.3-0.5%	3-5x improvement

End-to-end conversion from cold contact to paid user:

- Generic outreach: 0.05-0.15% (1-3 paid users per 2,000 contacts)
- Well-tuned generic: 0.10-0.20% (2-4 paid users per 2,000 contacts)
- Stratum: 0.30-0.50% (6-10 paid users per 2,000 contacts)

Stratum's 3-5x conversion improvement means the same outreach effort delivers 3-5x more users. Over 12 months, that's hundreds of users, not dozens.

4. Growth Scenarios: Users Per Month

Conservative (Stratum, Email Only, Slow Ramp)

Start with email outreach. 3-month warm-up. Single channel. US furniture stores only.

1	1,500	30	4-5	4-5
2	3,000	60	9-12	13-17
3	5,000	100	15-18	28-35
4	10,000	200	30-36	58-71
5	15,000	300	45-54	103-125
6	20,000	400	60-72	163-197
12	30,000	600	90-108	~500-600

Moderate (Stratum, Email+SMS, Faster Ramp)

Email from day 1. Add SMS at month 2. Multi-channel outreach. US broad market.

1	2,000	40	6-8	6-8
2	5,000	100	15-18	21-26
3	10,000	200	30-36	51-62
4	18,000	360	54-65	105-127
5	25,000	500	75-90	180-217
6	35,000	700	105-126	285-343
12	50,000	1,000	150-180	~1,000-1,200

Aggressive (Stratum, All Channels, Paid Ads)

Email + SMS + LinkedIn ads + Facebook retargeting. \$5K-10K/mo ad spend.

1	3,000	60	9-12	9-12
2	8,000	160	24-30	33-42
3	15,000	300	45-54	78-96
4	25,000	500	75-90	153-186
5	40,000	800	120-144	273-330
6	50,000	1,000	150-180	423-510
12	80,000	1,600	240-288	~1,800-2,000

From 100 users to ~2,000 in 12 months is achievable with Stratum + multi-channel + moderate ad spend. Generic outreach would yield ~400 users with the same spend.

5. The Build Decision: Four Paths

Path A: Traditional GTM Agency

Hire a GTM agency or consultant. They run outreach using standard playbooks and tools.

Cost: \$8,000-15,000/mo retainer

Conversion: 0.10% (generic messaging)

Setup: 4 weeks

Moat: None - any competitor can hire the same agency

Revenue in month 1: No

12-month projection (10K/mo): 72 paid users, \$120K spent, \$1,667/user

Path B: Stratum + Off-the-Shelf Tools (Recommended for Starting)

Use Stratum's API for diagnosis and message generation. Deliver via Mailchimp, HubSpot, or similar off-the-shelf tools.

Cost: ~\$400/mo tools + retainer portion

Conversion: 0.30% (3x better due to personalization)

Setup: 1 week

Moat: Low - you get Stratum's causal advantage, but delivery is commoditized

Revenue in month 1: Yes

12-month projection (10K/mo): 216 paid users, \$120K spent, \$556/user

Path C: Stratum + Custom Built (Long-Term Goal)

Jeremy builds a custom delivery layer (Twilio SMS, email infrastructure, dashboard, feedback loop). Stratum provides the intelligence.

Cost: Jeremy's retainer + ~\$500-2K/mo usage

Conversion: 0.40% (automation improves quality + SMS is higher converting)

Setup: 6 weeks (build time)

Moat: High - proprietary delivery + Stratum intelligence = hard to replicate

Revenue in month 1: No (building)

12-month projection (10K/mo): 288 paid users, \$120K spent, \$417/user

Path D: Build an Aktify Competitor (Not Recommended)

Build an SMS/email delivery platform from scratch. No Stratum. Just a delivery system.

Cost: \$8,000-12,000/mo in dev time (Jeremy's full focus)

Conversion: 0.15% (better delivery, but no causal intelligence)

Setup: 12 weeks (full build + carrier registration)

Moat: Medium - delivery is a commodity, hardest part is carrier relationships

Revenue in month 1: No

12-month projection (10K/mo): 108 paid users, \$144K spent, \$1,111/user

Path B first, then Path C. Get revenue in week 1. Build the moat in the background. Never take your foot off the revenue gas.

6. Side-by-Side Comparison (10,000 Contacts/Mo)

Factor	Traditional GTM	Stratum + Off-Shelf	Stratum + Custom	Build Aktify
Setup time	4 weeks	1 week	6 weeks	12 weeks
Revenue month 1?	No	Yes	No	No
Conversion rate	0.10%	0.30%	0.40%	0.15%
Paid users (6mo)	18	54	72	27
Paid users (12mo)	72	216	288	108
Cost per user	\$1,667	\$556	\$417	\$1,111
Total cost (12mo)	\$120K	\$120K	\$120K	\$120K
Personalization	Segments only	Per-vendor (manual)	Per-vendor (auto)	Templates only
Feedback loop	Monthly report	Manual tracking	Automated	None built
Competitive moat	None	Low (tools)	High (proprietary)	Medium (delivery)
Scales to 50K/mo?	Yes (costly)	Limited (tool caps)	Yes	Yes
Risk	Low	Low	Medium	High (3mo build)

7. Variables That Change the Numbers

Inputs You Control

Variable	Low	Medium	High	Impact on Users
Monthly contacts	2,000	15,000	50,000	25x (linear)
Channels	Email only	Email + SMS	+ Ads	3-4x
Personalization	Generic	Segmented	Stratum per-vendor	3-5x
Lead list quality	Random	Filtered	Scored + prioritized	2-3x
Send frequency	Monthly batch	Weekly	Real-time triggers	1.5-2x
Target AOV	<\$50	\$50-200	\$200+	2x (higher value)
Ad spend	\$0	\$2,000/mo	\$10,000/mo	2-4x

Outputs You Measure

Metric	Stratum Est.	Industry Avg	What Drives It
Email open rate	25-40%	15-25%	Subject line personalization
Email response rate	5-12%	1-3%	ROI proof in body
Click-to-demo rate	40-60%	20-30%	Message-barrier match
Trial-to-paid rate	12-18%	8-12%	Right-fit diagnosis
Opt-out rate	0.5-1%	1-3%	Relevance of message
Time to first response	<2 days	3-7 days	SMS vs email channel

8. Monthly Contact Capacity by Channel

Your growth rate is bounded not by market size but by how many vendors you can contact per month.

Channel	Month 1 (Warming)	Month 3+ (Steady)	Month 6+ (Scaled)	Cost
Cold Email	1,500	10,000	30,000+	\$0 + tool (\$59/mo)
SMS (10DLC)	500	3,000	10,000+	\$0.01/msg + ~\$100/mo
SMS (Short Code)	-	-	50,000+	\$500-1K/mo rent
LinkedIn (Manual)	500	1,000	2,000	\$0 (time)
LinkedIn (Auto)	-	-	100-200	Tool cost + ban risk
Combined	2,500	14,000	42,000+	Varies by mix

Delivery Costs at Scale

Channel	Cost per 10K contacts	Cost per 50K contacts	Notes
Email	\$10-30	\$30-100	Domain infrastructure + tool
SMS	\$100-200	\$500-1,000	\$0.0075-0.015/segment
LinkedIn	\$0 (manual)	\$500 (tool)	Manual doesn't scale linearly
Paid Ads	\$2,000-5,000	\$10,000-25,000	CPC model, varies by vertical

9. Recommended 12-Month Roadmap

Phase 1: Get Revenue Now (Weeks 1-4)

Start with the fastest path to revenue. Stratum diagnosis + off-the-shelf delivery.

- Week 1: Build lead list (Store Leads or manual shop scan)
- Week 2: Stratum diagnoses first 500 vendors, generates personalized messages
- Week 3: Send first batch via Mailchimp or similar
- Week 4: First responses. Analyze what's working.

Expected: 5-10 demo signups, 2-3 paid users. Revenue flows.

Phase 2: Build the Stack (Weeks 3-8, Parallel)

While revenue is flowing, Jeremy builds the proprietary delivery layer.

- Weeks 3-4: Twilio SMS integration (send + receive SMS)
- Weeks 5-6: Email infrastructure (domains, warm-up, sending pipeline)
- Weeks 6-7: Stratum auto-integration (API bridge from diagnosis to delivery)
- Weeks 7-8: Dashboard (lists, responses, conversion tracking)

At the end of Phase 2, you have automated multi-channel delivery with Stratum intelligence.

Phase 3: Scale (Months 3-12)

Full proprietary stack. Add channels. Optimize the feedback loop.

- Month 3: Switch from Mailchimp to custom email infra
- Month 4: Add SMS as second channel (higher conversion)
- Month 5-6: Add paid ads (use response data to inform targeting)
- Month 7-12: Scale to 50K+ contacts/mo. Model compounds.

12-Month Milestones

Month	Phase	Contacts/mo	Paid Users (cum)	Key Achievement
1	Revenue NOW	2,000	3-5	First users from Stratum messages
2	Revenue NOW	3,000	8-13	Automated Stratum pipeline
3	Build stack	5,000	18-28	Twilio SMS live
4	Build stack	10,000	38-58	Multi-channel delivery
5	Scale	15,000	68-103	Dashboard + feedback loop
6	Scale	20,000	108-163	Full proprietary stack
7-8	Scale	30,000	200-340	Ads added
9-12	Scale	50,000	450-650	Model compounds, moat solidifies

10. Competitive Positioning: Why This Works

The GTM Tools Gap

Every GTM tool in the market operates on correlation. They find prospects who look like past buyers. None diagnose cause.

Cognism/ZoomInfo: 'This store is in fashion' (category correlation)

UserGems: 'This store just hired someone' (event correlation)

6sense: 'This store is researching 3D tools' (intent correlation)

Gong: 'Winning deals say X' (pattern correlation)

Stratum: 'This store has 500 amateur-photographed SKUs + 22% returns = they need ALL3D' (causal diagnosis)

Why Competing Platforms Can't Replicate This

1. Decision graph takes 6+ months to build - 50 variables, 150+ relationships, domain expertise
2. Calibration needs real conversion data - Stratum will have it first
3. Feedback loop compounds - every conversion makes it smarter
4. Shopify integration is non-trivial - data extraction, rate limits, authentication
5. Multi-channel delivery is a separate product - SMS, email, compliance are real work

ALL3D's Strategic Window

No one else is doing causal GTM intelligence for ecommerce. ALL3D deploying Stratum first gives them:

A case study that defines a new category

Real conversion data that trains the model

A first-mover advantage that compounds

An acquisition channel competitors can't replicate

11. Cost Summary by Path (12 Months)

All paths assume 10,000 contacts/month after ramp, 12 months total.

Cost Category	Traditional GTM	Stratum + Off-Shelf	Stratum + Custom	Build Aktify
Setup cost	\$0	\$0	\$0 (dev time in retainer)	\$0
Monthly tools	\$400-800	\$400-800	\$500-2,000	\$300-500
Monthly retainer	\$8,000-15,000	In Stratum retainer	In Stratum retainer	\$8,000-12,000
Stratum retainer	\$0	\$4,000-8,000	\$8,000-12,000	\$0
10DLC registration	\$0	\$0	\$500 (one-time)	\$500
Ad spend (optional)	\$5K-10K/mo	\$5K-10K/mo	\$5K-10K/mo	\$5K-10K/mo
12-month total (no ads)	\$120K-190K	~\$120K	~\$120K	\$120K-150K
Users acquired	72	216	288	108
Cost per user (no ads)	\$1,667-2,639	\$556	\$417	\$1,111-1,389
Cost per user (with ads)	\$2,500+	\$1,000+	\$850+	\$2,000+

Lower cost per user AND higher total users. That's the Stratum advantage. Better conversion pays for the retainer and then some.

12. Appendix: Quick Reference

GTM Terminology for This Engagement

Term	Meaning
TAM	Total Addressable Market - total stores that could use ALL3D
CAC	Customer Acquisition Cost - total cost per paying user
LTV	Lifetime Value - total revenue per user
ICP	Ideal Customer Profile - the best-fit vendor type
PLG	Product-Led Growth - product drives acquisition
Outbound	You reach out to vendors directly (email, SMS)
Inbound	Vendors come to you (ads, content, SEO)
10DLC	10-Digit Long Code - carrier-approved SMS number
Conversion Rate	% of contacts who become users
Churn	% of users who leave per month

Contact Channel Recommendations by Stage

Vendor Type	Best Channel	Message Angle	Expected Response
Furniture, 500+ SKUs	Email	Photography cost savings	8-12%
Fashion, pro photos	Email	AI quality comparison	5-8%
Home decor, low CVR	SMS	Conversion lift from 3D	10-15%
New store, low AOV	SMS	Free, no credit card	8-12%
High AOV, premium	LinkedIn DM	Differentiation strategy	3-5%
