

GTM Primer

Selling Stratum's GTM Engine

Everything You Need to Know

Mark Gentry - MetaboMaxPro, Inc.

Jeremy Elliott - Gentry Elliott Inc

June 2026

1. What Is GTM?

GTM (Go-to-Market) is the entire system that turns a product into revenue. It's not just marketing. It's not just sales. It's the whole machine: how you find customers, convince them, sell them, onboard them, and keep them.

A company's GTM strategy answers five questions:

Who are we selling to? (ICP - Ideal Customer Profile)

What do we say to them? (Messaging, positioning, value prop)

How do we reach them? (Channels: email, SMS, ads, inbound, partnerships)

How do we sell to them? (Motion: self-serve, sales-led, channel)

How much does it cost to acquire them? (CAC - Customer Acquisition Cost)

2. The Three GTM Motions

Companies pick a primary motion. Knowing which one your client uses tells you how to position Stratum:

PLG	Product sells itself	Slack, Canva, Calendly	Get more people into the free trial
SLG	Sales reps demo+close	ZoomInfo, Salesforce	Fill top of funnel with qualified leads
MLG	Content, ads, inbound	HubSpot, most B2B SaaS	Identify who to target and what to say

ALL3D is PLG - free demo, generate images, pay if you like it. But their funnel leaks at step 1 (nobody clicks the demo). Stratum plugs in right there.

3. T

Every GTM person knows these stages. Point to exactly where Stratum works:

- Awareness - 'They don't know we exist'
- Interest - 'They know us, do they care?'
- Consideration - 'Are we better than alternatives?'
- Trial/Demo - 'Will they try it?'
- Purchase - 'Will they pay?'
- Retention - 'Will they stay?'

Every GTM tool optimizes one stage. Cognism = Awareness. HockeyStack = Interest. Gong = Consideration. Outreach = Trial. Salesforce = Purchase. Userpilot = Retention.
No tool optimizes the Consideration-to-Trial transition at a per-prospect level. That's the gap Stratum fills.

4. The GTM Tech Stack

A typical mid-market GTM stack costs \$3K-15K/mo:

CRM	Salesforce / HubSpot	\$1K-3K	Track leads, deals, pipeline
Data	ZoomInfo / Cognism	\$1K-3K	Contact database + intent signals
Engagement	Outreach / Salesloft	\$1K-3K	Email sequences, cadences
Analytics	HockeyStack / Mixpanel	\$1K-2K	Funnel tracking, attribution
Conversation	Gong / Chorus	\$1K-2K	Record and analyze sales calls
ABM	6sense / Demandbase	\$3K-8K	Account targeting, ads
Onboarding	Userpilot / Pendo	\$500-1K	Product tours, feature adoption
Conversion	OptinMonster / VWO	\$100-500	A/B testing, popups

Total: \$8K-22K/mo for a moderately sophisticated stack.

What Stratum replaces:

- Cognism/ZoomInfo (data) - Stratum reads Shopify directly
- Outreach/Salesloft (engagement) - Stratum generates the message, Aktify delivers
- 6sense/ABM (targeting) - Stratum's causal diagnosis IS targeting
- HockeyStack (analytics) - Stratum's feedback loop IS measurement

One platform, one retainer, replaces four categories of spend.

5. Key GTM Metrics

Know these. Use them in your pitch.

CAC	Cost to acquire a customer	< \$500 for PLG	Send only relevant messages
LTV	Lifetime value of a customer	3x CAC minimum	Better leads stay longer
Conversion Rate	Visitors to signups	2-5%	Stratum targets 5-10%
Response Rate	Reply to cold outreach	3-8%	Stratum targets 10-15%
Demo-to-Paid	Trial users who pay	5-15%	Target right-fit vendors
Pipeline Velocity	Lead to close speed	Faster = better	Pre-qualified close faster
Churn	Customers who leave	< 5%/mo	Better fit = stay longer
MQL to SQL	Qualification rate	20-30%	Diagnosis IS qualification

6. GTM Pain Points Stratum Solves

Every GTM leader has these exact complaints. Use them in your pitch.

P

Low response	"Nobody replies to our emails"	Personalize per vendor's metrics
Bad targeting	"Messaging people who don't need us"	Diagnose who actually needs it
No differentiation	"Competitors send same message"	Only platform with per-vendor causal Dx
Expensive stack	"15 tools, none talk to each other"	Replace 4 categories with one
Can't prove ROI	"Spent X, got Y back"	Predict ROI per vendor before sending
Static playbook	"What worked stopped working"	Learns from every response

7. How to Describe Stratum to a GTM Person

Elevator Pitch

"Stratum is a causal GTM engine. Instead of guessing who might want your product based on industry or job title, it reads each prospect's actual business data, diagnoses exactly why they haven't tried your demo, and generates a personalized message that proves ROI before they click."

When

"Cognism tells you WHO to contact. 6sense tells you WHEN they're researching. Gong tells you WHAT happened on the call. Stratum tells you WHY a specific prospect would benefit from your product - and says it to them in a way that makes them agree."

When

"Our confidence scores are calibrated. When Stratum says 85% confidence in a barrier, the model is right 85% of the time. And every conversion makes it better."

When

"For Shopify vendors, we read public store data directly from the Shopify API - SKU count, photo quality, AOV, return rate, conversion rate. The diagnosis is based on their actual business metrics, not their LinkedIn profile."

When

"We plug into your existing CRM and delivery channels. We feed diagnoses and personalized messages into whatever tool you already use for outreach - or we can handle delivery ourselves via Aktify."

8. GTM Terminology Cheat Sheet

Term	Definition
ICP	Ideal Customer Profile - the perfect customer for your product
CAC	Customer Acquisition Cost - total cost to get one paying customer
LTV / CLV	Lifetime Value - total revenue a customer generates
MQL	Marketing Qualified Lead - someone who showed interest
SQL	Sales Qualified Lead - someone ready to talk to sales
Pipeline	All deals at every stage, from first contact to closed
Velocity	How fast deals move through the pipeline
Churn	Customers who cancel or stop paying
ARR	Annual Recurring Revenue - subscription revenue annualized
Net Revenue Retention	Revenue from existing customers after upgrades/downgrades/churn
Conversion Rate	% who do what you want (visit->signup, trial->paid)
Outbound	You reach out to them (cold email, call, LinkedIn)
Inbound	They come to you (SEO, content, ads, word of mouth)
ABM	Account-Based Marketing - target specific accounts, not individuals
PLG	Product-Led Growth - the product sells itself
SLG	Sales-Led Growth - sales reps drive the deal
SDR / BDR	Sales/Business Development Rep - finds and qualifies leads
AE	Account Executive - closes deals
RevOps	Revenue Operations - the function that runs the GTM machine
Attribution	Which channel or touchpoint caused the sale
Intent Data	Signals that someone is researching your category
Lead Scoring	Ranking leads by how likely they are to buy

9. Your Positioning for ALL3D

When you pitch Amra, lead with this:

Your current GTM stack optimizes engagement. It tells you who opened an email, who visited your site, who downloaded a white paper. But none of it tells you WHY a specific Shopify vendor hasn't tried your free demo.

Stratum is the only tool that diagnoses cause.

For a furniture store with 500 amateur-photographed SKUs and a 22% return rate, the cause is: 'They don't know how much photography costs.' For a fashion boutique with pro photos and a \$250 AOV, the cause is: 'They tried a bad AI tool and think all AI is the same.'

A single message can't overcome both barriers. But Stratum generates a different message for each.

It's not a better version of an existing tool. It's a new category.

10. Objection Handling

Objection	Your Response
"We don't have Shopify API access"	We don't need it yet. For the PoC we scan public data. We go deeper in Phase 1.
"We already use Cognism/6sense"	Great. They tell you WHO. We tell you WHY. Stratum sits on top and makes them smarter.
"How do I know the diagnosis is right?"	Every diagnosis has a calibration score. If we say 85%, we're right 85% of the time. And we validate with real responses.
"This sounds expensive"	You're paying \$8K-22K/mo for a stack that doesn't answer 'why.' Stratum replaces four layers and answers the one question.
"We'll build this ourselves"	The decision graph has 150+ causal relationships. It took us six months of iteration. And every conversion makes it smarter.
"Do you have case studies?"	ALL3D can be the first. That's exactly why we're offering a partnership rate.

Bottom line: GTM tools optimize engagement. Stratum diagnoses cause. That's the difference between knowing who opened an email and knowing why a specific shop should become your customer.
